

USUAL OUTPUT BULLION MADE TON. BELMONT

Mine Showing Large Reserves
of Good Grade Ore On Num-
erous Shaft Levels

EARNING IS BEING INCREASED

Coming Summer Promises to
Witness Record Breaking Pro-
duction Being in Order

Tonopah Belmont Development company continues to set the high pace regarding production, and with the shipment made during the last week consisting of 61 bars, weighing 122,072 ounces and having a value of \$10,202, a new record was established for the summer season.

The report for the seven-day period ending Wednesday, June 7th, shows the mine to be in a splendid condition physically, and large veins of ore are showing on the various levels. The report reads:

"700 level—North crosscut 707 is being extended in the hanging wall of the Mizpah fault.

"800 level—West drift 8055 off of north crosscut 8050 has been started on two feet of low grade ore.

"900 level—Northwest crosscut 9005 prospecting trachyte. West drift 9035 has been advanced some distance on the Favorite vein and shows two feet of mill ore. Intermediate south crosscut No. 1 off of stope 910 is prospecting for a footwall branch of the Mizpah vein.

"1000 level—East drift 10080 shows four feet of good ore. East drift 10079 has been advanced on two feet of good ore. Northeast crosscut 10031 has been started for the purpose of developing and mining the A branch of the Mizpah vein.

"1100 level—South crosscut No. 2 has been advanced for the purpose of ventilation. Southeast crosscut 11016 has been advanced for the purpose of picking up a faulted segment of the Belmont vein. East drift 11017 is being driven on two feet of ore.

"1200 level—Intermediate west drift off intermediate south crosscut off of east stope 5 on the footwall branch of the Belmont vein shows two to three feet of good ore. Intermediate southeast crosscut No. 3 off of stope 5 has been started for the purpose of prospecting for the footwall branch of the Belmont vein.

"1300 level—East drift 1412 has been advanced on the 1220 vein and shows two feet of ore. West drift 1413 has again been started on the Mizpah fault."

CALIFORNIANS WILL EDUCATE VISITORS

(By Associated Press)
SAN FRANCISCO, June 10.—Visitors to California attending the Shrine convention here next week will be given an opportunity to learn, by means of exhibits arranged by the California Development Association, the extent of agricultural progress in the state.

Growers' cooperative marketing associations in the orange, prune, apricot, peach, poultry, dairy and other industries will have displays and for the first time in the history of the state the large saw mill operators will combine to show California's lumber production.

FIRE PROTECTION IS PROMISED YOSEMITE

(By Associated Press)
CALIF. June 10.—Comprehensive plans for protecting Yosemite valley from fire were worked out here recently by Capt. T. J. Harrington of the San Francisco fire department, who was in charge of fire protection in the Panama Pacific exposition in that city in 1915.

The situation here is similar to that at the exposition, according to Harrington. Although there is virtually no menace to human life in the valley, as visitors live in detached cabins, fire would wreck the season's business.

At the exposition, \$50,000,000 worth of exhibits were protected for months with only \$350 fire loss.

EXTENSION IS PROVING BIG ORE RESERVES

Eighteen Eighty Level Showing
Large Bodies of Ore Better
Than Average Grade

EARNING BEING AUGMENTED

Sinking of Victor Shaft is Pro-
gressing in Satisfactory
Manner to Management

Tonopah Extension Mining company is gradually increasing its production of bullion, with a corresponding increase in the net earnings. During the past week 34 bars of bullion were sent out, weighing 65,364 ounces and having a value of \$73,000, or an increase of \$10,000 over the first 15 days of May.

There is a splendid ore showing on the 1880 level of the Victor shaft, and large bodies of excellent grade ore exposed, sinking of this shaft from the 1880 point is progressing satisfactorily, as is evidenced from the official report covering operations for the week ending Friday, May 9, which follows:

McKane Shaft

"1200 level—1203 west drift advanced 23 feet on low grade quartz. 1203 crosscut advanced 20 feet in trachyte.

Victor Shaft

"1600 intermediate level—Stoping is in progress on Merger vein.

"1650 level—Stoping is in progress on Murray vein.

"1760 level—1718 crosscut was continued in Extension breccia. Stoping is in progress on Murray and Anchor veins.

"1804 intermediate level—No. 2 west drift was continued on low grade ore. No. 2 east drift was continued on 8 feet of average ore. No. 2 raise advanced 14 feet on 6 feet of ore. No. 3 east drift advanced 14 feet on low grade ore.

"1850 level—1802 west drift, Anchor vein, advanced 20 feet on low grade quartz. 1803 west drift, Murray vein, footwall branch, advanced 22 feet on 6 feet good ore. 1805 west drift, Murray vein, hanging wall branch, advanced 21 feet on 5 feet of good ore. 1809 west drift, Murray vein, middle branch advanced 30 feet on 5 feet of ore. 1801 drift advanced 6 feet on 6 feet of medium grade ore. 1803 crosscut advanced 15 feet in hanging wall of Anchor vein.

1808 crosscut advanced 7 feet in footwall of Murray vein. 7809 crosscut advanced 30 feet in good grade ore in the hanging wall of the footwall branch of the Murray vein. 1807 raise advanced 10 feet on 6 feet of ore. 1810 raise advanced 13 feet on 6 feet of high grade ore. Murray vein, middle branch. Stoping is in progress on Murray and Anchor veins.

Sinking of Victor shaft made good progress. Development, 310 feet."

BIG SHIPMENT IS MADE FROM THE GOLD ZONE

Showing is Satisfactory and
Nice Earning is Resulting
for Treasury Company

Gold Zone Divide Mining company continues to maintain a production averaging around 400 tons monthly, which is about 100 tons more than anticipated at the time shipments were inaugurated several weeks ago. During the week just drawn to a close a shipment of 95 tons was consigned to the Belmont mill and the usual values are reported as having been contained.

The physical condition of the mine is reported as being excellent. The official report given out this morning by H. R. Bradley, the superintendent, shows that 608 intermediate drift was extended for 12 feet in low grade ore, and that drift 610 was extended 9 feet in low grade ore.

SHIPPING BOARD TO SELL JUNKED GOODS

(By Associated Press)

PORTLAND, June 10.—With an auction sale of engines, boilers, life boats, winches, windlasses and anchor chains here July 11, at which property worth between \$300,000 and \$400,000 will be disposed of, the material and sales division of the United States shipping board here expects to clear its decks of all the accumulation left on hand when construction stopped at this port.

During the past few months the division here has sold, mainly to merchants, in large lots, a great variety of supplies, and has realized about \$500,000. Hand saws, hammers, hardware, rope, cutlery and culinary articles of all descriptions, in fact everything going to the fitting up of a vessel has been included in the miscellaneous array of stuff "going over the counter."

EFFICIENCY IS WATCHWORD AT THE WEST END

Production Being Augmented
From Week to Week and Big
Earnings Resulting

LARGE RESERVES SHOWING

Two Mills Continue to Turn Out
Large Amount of Silver
and Gold Bullion

West End production is showing a decided increase of late weeks and the last shipment of bullion sent out consisted of 50 bars, weighing 93,600 ounces, having a value of \$104,900. This was an increase of \$18,488 over the preceding 15 days, and only goes to show that mine and mill operations are going forward at a high rate of efficiency.

The official report of operations for the week ending Saturday morning, June 10, follows:

"From the West End shaft workings, crosscut 311A has been discontinued and raise 311A started from the crosscut. The face of the raise shows a full face of low grade ore. Raise 441 has been discontinued and an intermediate level has been established from the raise. Crosscut 525 has been driven ahead in the footwall of the vein. Crosscut 682 No. 1 made good progress with no change to report. On the 960 level, raises 973 and 974 made good progress. Both faces are in low grade quartz.

"In the Ohio workings, crosscut 501 made a small advance and has been discontinued. Raise 552 is raising on a face of low grade ore. Raise 553 has been started from the 501 crosscut to prospect the hanging wall. Crosscut 614 made good progress with no change. Work in the 802 crosscut made a small advance and has been discontinued. Raise 552 is raising on a face of low grade ore. Raise 553 has been started from the 501 crosscut to prospect the

PISTACHIO TREES HAVE GOOD GROWTH

(By Associated Press)
CHICO, Cal., June 10.—More than 75 per cent of the pistachio trees planted along the state highway near here last year by Chico citizens have survived, despite wind, weather and nibbling sheep, according to W. E. Glendonning of the state forestry bureau. He said state highway commission men had taken good care of the trees and the commission probably will provide wire guards to prevent further depredations by the stock.

SECOND HAND CARS PARKED IN A POOL

(By Associated Press)
RENO, June 10.—Four large automobile concerns in Reno have adopted the plan of pooling all their second hand cars and parking them in an empty lot to make it easier for the public to learn what used cars are in the market. The plan is said to have been copied from several California cities. The cars are being advertised at "clean up" prices.

hanging wall. Crosscut 614 made good progress with no change. Work in the 802 crosscut advanced without change. Crosscut 573 cut a contact and has been temporarily stopped. Raise 874 has been started from crosscut 762. The footage for the week was 212 feet.

"Tonnage and grade was normal with production of 2100 tons for the week."
